Since nowadays student doesn't like school they prefer working, I would like to have this place so that they can be busy all day and stay away from the bad influence having lots of training as in like a work place. I will give training based on their future work. Since it says "travay dir pou nou sesel" our young people will work hard for our beautiful Seychelles and we will have more workers as well.

From different job I will hire a respective person from the job asked to give the student training based on its choice.

Eg: waitress, a trainee can come to the place to teach the student.

As the student has learn enough they will be send on a 1 month work attachment where they could learn more and do some practice. Then they will be back in the training organization till they are ready to be sending in the world of work.

I will work with a maximum of 10 students (5girl, 5 boys) aged between 14-17 years old.

I want them to get an allowance every month.
